

EVENT MANAGEMENT SYSTEM

Presentation

E V E N T S

Project Overview

➤ **Manage all transactions**

➤ **Create and manage bookings**

➤ **Access a booking calendar**

➤ **Maintain employee details**

➤ **Track expense details**

➤ **Define expense types**

➤ **Specify event types**

Introduction

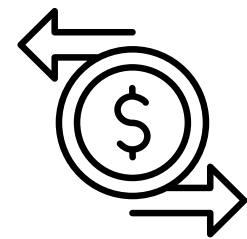

Our Event Management System (EMS) Application streamlines event planning and execution, catering to business owner needs.:

- **Transactions:** Track financial activities.
- **Bookings:** Create and manage event bookings.
- **Invoices:** Generate detailed invoices.
- **Customer Records:** Maintain customer information.
- **Daily Activities:** Monitor day-to-day operations.
- **Reports:** Generate customized business reports.

Technical Stack

- Java: 1.8
- React: 16.13.1
- Spring Boot: 2.2.0
- MySQL: 5.6
- Application Server: Tomcat 9

Features

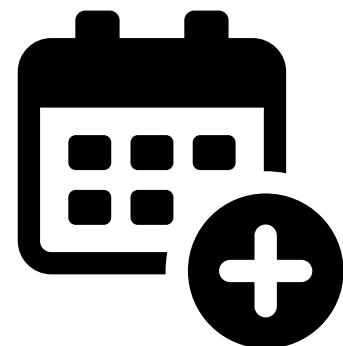

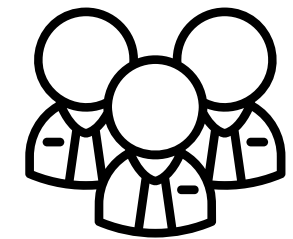

Transaction Management:

Comprehensive tracking of all financial transactions

Employee Management:

Store and manage employee details and roles

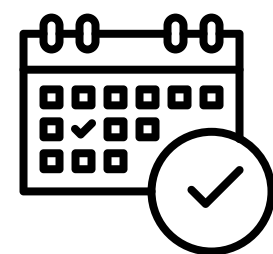

Booking Creation & Management:

Easy interface for creating and managing event bookings

Expense Tracking:

Detailed logging of expenses and Categorization by expense types

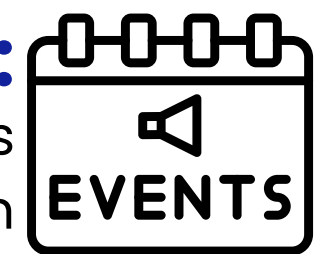

Booking Calendar:

Visual calendar for overview and scheduling of events

Event Type Details:

Customizable event types for better organization

Modules

SCREENSHOTS

Dashboard

Homepage Dashboard: Displays all modules. Access any module directly via the navigation bar or dashboard.

The screenshot displays the 'EVENT BOOKING SYSTEM' dashboard. On the left is a dark navigation sidebar with the following items: Dashboard, Booking (with a dropdown arrow), Create Booking, Booking Details, Booking Calender, Employee (with a dropdown arrow), Employee Details, Expense (with a dropdown arrow), Expense Details, and Expense Types. The main content area features a top header with 'Welcome()' and user icons. Below this are four summary cards: 'Events (Today)' with a value of 0 for 24-1-2024; 'Events (Week)' with a value of 0 for 2024-01-21 - 2024-01-27; 'Events (Month)' with a value of 0 for 2024-01-01 - 2024-01-31; and 'Revenue (Month)' showing 0 Loss, with input fields for Start Date and End Date. At the bottom is an 'Expenses' section with a teal header showing 'Expenses : 0' and 'Amount : 0'. It includes date filters (mm/dd/yyyy) and 'FILTER' and 'RESET' buttons. Below the header is a chart area with a y-axis ranging from 0.8 to 1.0.

Create Customers booking

Booking Module: Users can create bookings by filling in details and advance payments.

Create Event type

- In this module, the user perform the following functions:
 - We can create Event type.

The screenshot displays the 'EVENT BOOKING SYSTEM' interface. The top navigation bar is dark purple with the system name on the left and 'Welcome()' with a user profile icon on the right. A sidebar menu on the left lists various modules: Dashboard, Booking, Employee, Expense, and Event. The 'Event' module is currently selected, showing a sub-menu with 'Event Type Det...'. The main content area is a form for creating an event type, featuring two input fields: 'Event Name' with the value 'Birthday' and 'Event Description' with the value 'Party'. Below the input fields are two buttons: a red 'CANCEL' button and a dark blue 'SUBMIT' button.

Event type details

- In this module, the user perform the following functions:
 - We can view the details of event type.

The screenshot displays the 'EVENT BOOKING SYSTEM' interface. The top navigation bar includes the system name and a 'Welcome()' message. A sidebar menu on the left lists various sections: Dashboard, Booking, Employee, Expense, Expense Details, Expense Types, Event, and Event Type Det... The main content area is titled 'Event Type Details' and features a 'Create Event Type' button. Below this is a table with three columns: S.No, Event Type, and Event Description. Each row in the table includes 'Edit' and 'Delete' buttons.

S.No	Event Type	Event Description	Edit	Delete
1	Wedding	mariages	EDIT	DELETE
2	Sports Party	party	EDIT	DELETE
3	office party	ofc party	EDIT	DELETE
