

## Project Overview

The Tool Management System (TMS) is an application designed for all tool rooms within the Maintenance Department. It facilitates the control and management of tools, special equipment, portable devices, and consumables to effectively support the department's operations.

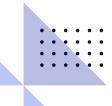

### **ABOUT US**

- Simpana Technologies is all about excellence, passion and flexibility. We have offered world class services in IT consulting, offshore software development, testing and user interface design.
- We work on diverse projects ranging from simple information systems and websites to complex enterprise type architectures, desktop or web-enabled applications, traditional n-tier and service oriented architectures. We follow three main rules to get to our goals: do it on-time, do it within scope and offer the best services.

### **OUR MISSION**

Our mission combines work and talent. We seek to achieve extraordinary results by helping our clients make distinctive improvements. How do we do it? By leveraging best-of-breed technology and building a great company that is profitable and appeals to, helps develop and retains exceptional people.

Our passion for what we do led us here. Our vision guides our business every day to provide one of the best IT consulting and software development services while taking care of our people and honoring our values.

### **OUR VISION**

### Introduction

### **Uniform Information Organization**

• Efficiently organizes and integrates plant tools information for streamlined operations.

#### **Tool Catalog Management**

 Stores and manages the complete tool catalog in a centralized database via the tool management system.

### **Production-Specific Focus**

 Tailored to focus on production-specific data, distinct from broader management systems.

### **Spare Parts Management**

 Handles spare parts used in production, ensuring proper tracking and data management.

### Scope

### Item Identification and Classification

Streamlines tool management with accurate identification and classification of tools for efficient tracking and usage.

Tool tracking, manage and distribution

Optimizes tool tracking, manages inventory, and streamlines distribution for effective utilization and control.

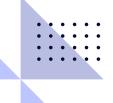

Facilitates efficient borrowing and retrieval of tools, ensuring easy access and return management.

## New Item requisition

Streamlines the process for requesting and acquiring new tools or items, ensuring timely procurement and inventory updates.

## Management of inspection and calibration.

Ensures systematic inspection and calibration of tools for maintaining accuracy and reliability.

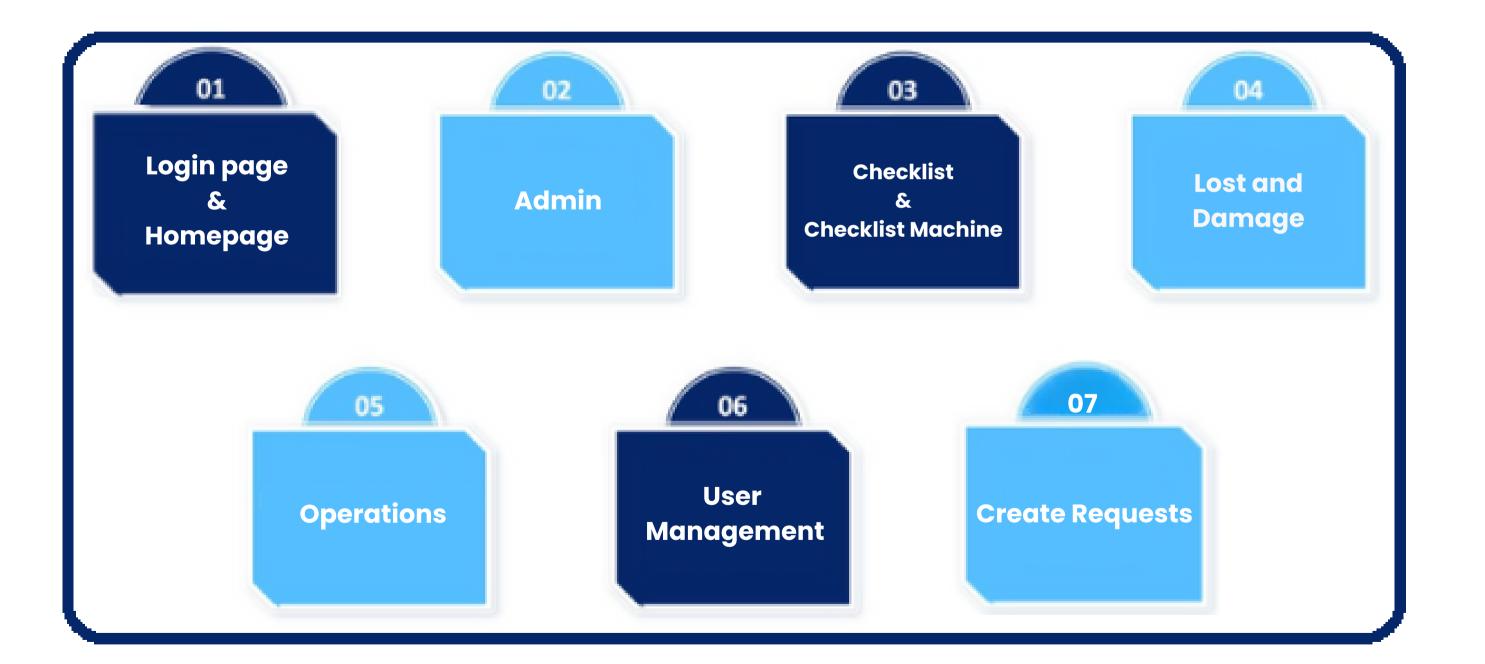

- Manages Tool Operations
- Enhances and Optimizes Tool Management
- Ensures Efficient Tool Tracking and Distribution
- Enhances Tool Data Accuracy and Visibility
  - Streamlines Tool Management Processes
